Study title: Safeguarding Adults for Empowerment (the SAFE project)

Ref: WP1, stage 2 + WP2.

Date:

Hello,

We are writing to you to ask for your help with a research project. We are doing a research study about older people and adult safeguarding. We are doing this to better understand older people's views about safety and to understand how people are supported in cases where there has been abuse and neglect.

We would like to speak with you to understand your views about this area, because you may have experienced abuse and neglect (or have a family member with this experience) and have been supported by local adult safeguarding processes.

If you are interested in this research please view the attached information sheet which tells you more about the study and what will be involved if you decide to take part.

If you do not wish to take part then you do not need to do anything more. If you would like to take part please get in touch using the contact details on the information sheet. Please also get in touch if you have any questions or would like to speak with us about the research.

Thank you for your help,

Best wishes,

Sarah
